

Complete Integrated Building **Technology** Solution

Australia's first fully integrated smart apartment solution by DNAKE.

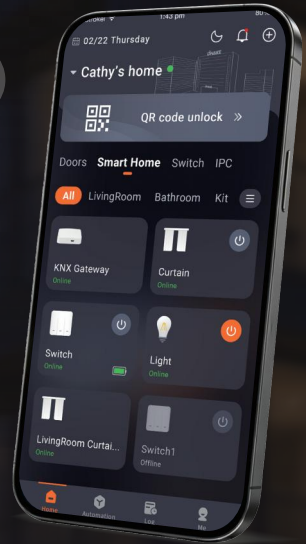

Powered by the DNAKE Smart Pro App

Seamlessly combining intercom, building access control, apartment smart locks, and smart home automation – all managed through a single resident app from one provider.

The DNAKE solution, in partnership with Epsilon

Delivers a simple, fully integrated and intuitive experience for both residents and building managers – a true game changer in modern apartment living.

One App . Four Systems

Remote Video Intercom

Intercom

Access Control

Flexible Entry

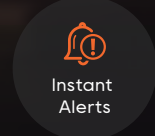

Remote Unlock

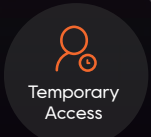

Smart Lock

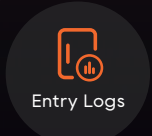

Smart Home Automation

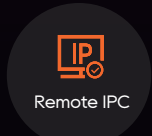

Instant Alerts

Temporary Access

Entry Logs

Remote IPC

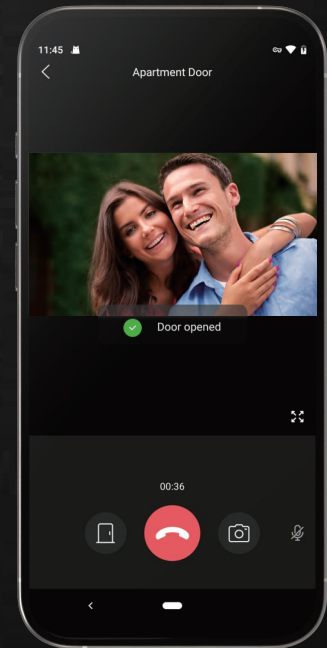

Voice Control

Smart Intercom System

DNAKE Smart Pro App offers:

-  Visitor preview before answering
-  Video call with voice changer
-  Active door monitoring
-  Ability to call indoor monitor or property manager
-  Property Manager mode

- WiFi 2.4G / 5G (Optional)
- Dimension: 264.3 x 160 x 11.8 mm

Remote Access Solution

A resident at work receives a delivery call at the gate. They see the courier on video, speak, and unlock the door remotely - no need to rush home.

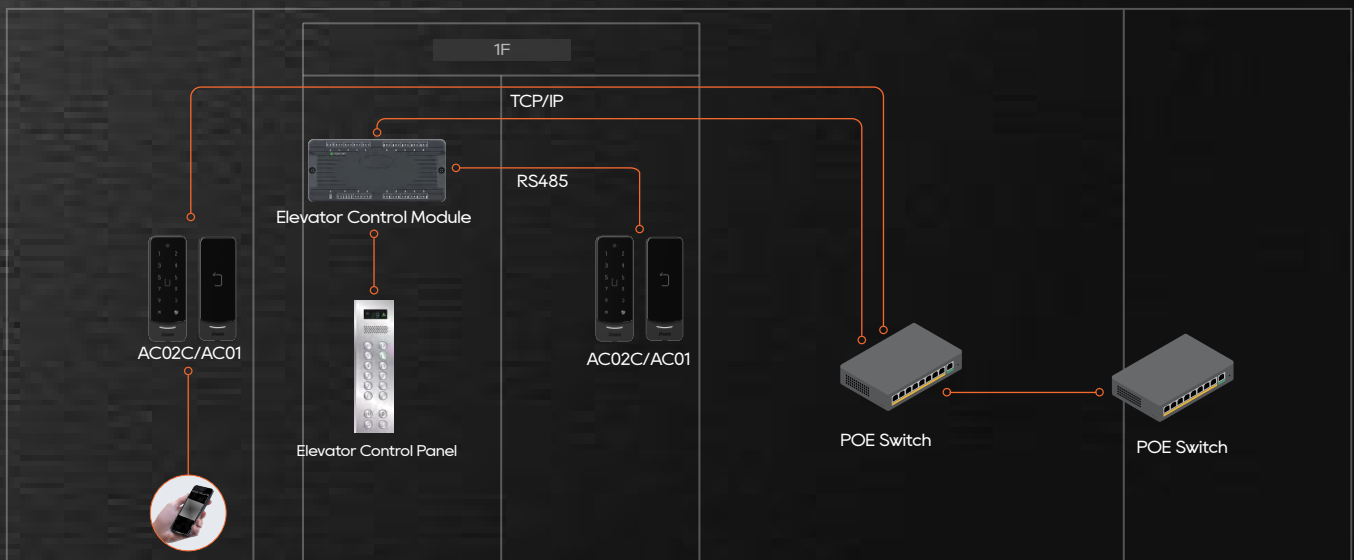

Access Control

DNAKE Smart Pro App supports:

- 1 **Unlock function:** App, Bluetooth, QR, Siri, Apple Watch, Face recognition (door station required)
- 2 **Temp keys:** One-time, daily, weekly
- 3 **Elevator control:** Up, down, release floors

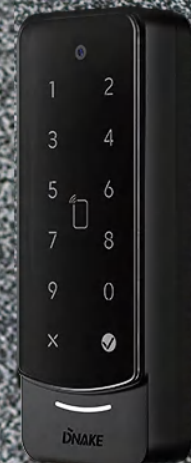

Interconnection: Hardware & App

AC02C

Access Control Terminal

- Minimalist design
- Open doors from anywhere
- Flexible access methods
- Web-based management

Temporary Access Solution

A resident gives their housekeeper a password that works only on scheduled days. It expires automatically – no key handover, no security risk.

Smart Locks

Multiple unlock methods

App, Bluetooth, fingerprint, password, card, mechanical key

Voice control

Works with Google Home & Amazon Alexa

Australian Standard mortice lock

Fire-rated, fits wood/metal doors

Scene automation

Unlocking activates preset scenes via smart home integration

Stylish finishes

Available in Satin Nickel or Matt Black

App in Smart Lock

- 1 Send temporary passwords remotely
- 2 Unlock history tracking (3 months)
- 3 Tamper alert push notification
- 4 Doorbell support on the lock (local with app integration)
- 5 Download from:  Google Play  App Store

Supports both Build to Sell (BTS) and Build to Rent (BTR) projects.

DNAKE Smart Pro App is expanding into smart home automation.

1 Smart control Zigbee devices

2 Supports Clipsal iconic devices

3 Zigbee 3.0 gateway and compatible devices

4 Modules for lighting, blinds, and HVAC control

Integration Capabilities

Open API

For device and cloud integration

Open SDK

For custom app development

Dual-Lines

Register to SIP servers

ONVIF compliant

Add up to 16 IP cameras

Project Delivery and **Service** Support

Epsilon Tech delivers integrated technology solutions across residential, commercial and mixed-use developments. The company specialises in providing secure, scalable and sophisticated intercom and access control systems, smart locks and home automation products, that combine clever engineering with practical field delivery.

With strong capability across design, supply, installation and ongoing technical support, Epsilon Tech works to ensure that technology integrations are reliable, maintainable and aligned with long-term asset performance.

Project Delivery Capability

- End-to-end sales and project management
- Coordination with builders, developers and consultants
- On-site cabling, fit off and commissioning resources with a team of 50+ across VIC, NSW, ACT and QLD
- Practical completion support
- Resident and building manager handover processes including on-site training of electronic security systems and supporting Apps

Ongoing Support Services

- Helpdesk support
- Remote diagnostics and troubleshooting
- On-site technical Service Support resources with a team of 15+ across VIC, NSW, ACT and QLD
- Preventive maintenance programs
- FOB and BLE Credentials including user administration

Differentiators

- Integrated approach (not siloed trades)
- Strong IT and network understanding (critical for modern IP systems)
- Focus on long-term supportability
- Experience across over >6,000 sites, and in business for 45+ years
